

ADMINISTRATIVE - INTERNAL USE ONLY

3 December 1982

NOTE FOR D/ODP

Reference your request on 2 Dec for a update on the status of our effort to place the Burroughs Systems. Mr. Fitzwater will be happy to know that the Navy seems to be coming to our rescue.

o Russ Stokes of the Naval Supply System Command (NSSC) was contacted today and confirmed that he will acquire two 6900 systems and a letter of intent in being drafted addressed to our DDA. He is agreeable to picking up the packing and shipping charges and wishes to negotiate with us on the actual acquisition costs of the systems. He estimates two months for site preparation but he has storage facilities available if the equipment must be moved prior to site preparation completion.

STAT o Contacted the elusive [] - He is assigned to the Continental Security Group which handles the materiel purchases for the Naval Security Group. He gave a qualified yes to acquiring the remaining three 6900 systems. He will follow-up with Don Cole of Burroughs on the technical aspects of the systems and will contact Russ Stokes re the possibility of combining their efforts. He understands there is somewhat of an urgency to resolve the disposition of the equipment and will get back to us as soon as possible. [] feels the proposed applications for these systems falls within the IC and he observed the funding source of several of the programs the computers would support is IC and possibly CIA. A list of the available equipment is being forwarded to him today.

o The other NSSC contact who handles the acquisition of equipment for the 22 world-wide centers is out of the country till next week. I plan to ask if he would be interested in acquiring any portions of the systems that his fellow NSSC members may not be interested in acquiring. For example, I know that Russ Stokes does not need the full system configuration to support the Datacomm applications the 6900 are being acquired to preform.
